ONE STOP DESIGN

- 
- 1、 **VISION**
Enable every designer feel free to use the materials
 - 2、 **MISSION**
Work with designer together and focus on their needs
 - 3、 **VALUE**
Dedicated design service and help employee to achieve career success

[Introduction]

We partner and collaborate with some of the best company who manages a strong R&D team and professional factory to immediately solve the needs of commercial space customized materials, special space functional materials, industry material standards, etc and thus promote the widest application of new building materials.

We are committed to establishing a standardized, cooperative, mutual trust, and win-win cooperate relationship with our clients. Taking standardized cooperation as the starting point of development, mutual trust as the principle of development, and win-win as the development goal.

GO WITH DESIGN

- (1)Material customized;
- (2)Material mirror wall panel;
- (3)Metal film wall panel.

Customized Wall Board Series

The wall board produced by the company have complete specifications, complete supporting facilities and various colors. Its own production of ecological environmental protection materials and polymer film, combined with advanced production technology and one-time hot pressing technology molding, with stone series, wood series, wallpaper series, skin friendly series and nearly 200 colors.

Wallboard has the characteristics of fast installation, environmental protection and health, waterproof and moisture-proof, thermal insulation, and fashion, and is a high-quality substitute for wood and stone and wallpaper decorative materials. It has unique advantages in the whole house decoration and can be widely used in the decoration of home decoration, office, administrative building, hotel, restaurant, bars, KTV and other places.

MAX: 2400*600mm

Soft Rock has a soft texture and a visually beautiful art, with a three-dimensional shape and good taste. It is an eco-friendly high-end building material for decoration. The kitchen and bathroom series are made of high ecological and environmentally friendly materials and pure natural stone powder, which are formaldehyde free, radiation free, three-dimensional and bright, with rich colors, convenient and fast installation, and firm adhesion. Fully unleash the creativity and inspiration of artists. Soft rock, with an international perspective, continues the international aesthetic trend and inherits international fashion taste.

Lightness makes height no longer a problem

Soft and bending is simpler and shapes with objects

Beautiful · Natural color, natural effect

CONCRETE CAST SLAB

1. Indoor and outdoor decorative board developed from mineral raw materials such as cement, super light weight, high wear resistance, low density, flexible and crimp, tough and impact resistant, formaldehyde-free and other harmful classification A1 fire prevention, sun exposure, UV resistance, waterproof and impermeable weather resistance is superior.

2. It can be used on the ground, wall and top surface. Is the personality of the theme store, brand store wall, table, bar decoration. Especially suitable for use in bathrooms, toilets, underground garage damp places, but also exposed to the wind and sun outside walls, wall panels and garden facilities construction of the first choice.

3. Installation and construction is also extremely simple, can be sawed, planed, adhesive, nail.

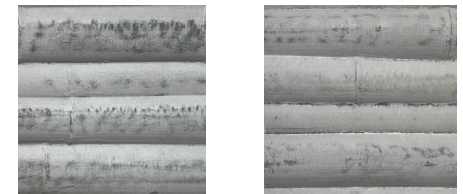

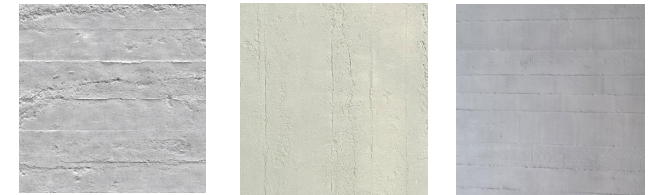

4. Product shape, color, specifications can be customized according to customer needs.

FOAM CERAMICS

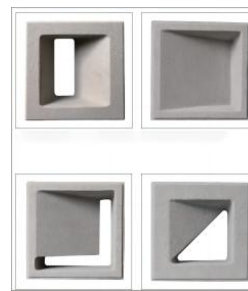

GO WITH DESIGN

190*190*24mm

Foam ceramics
/texture plate

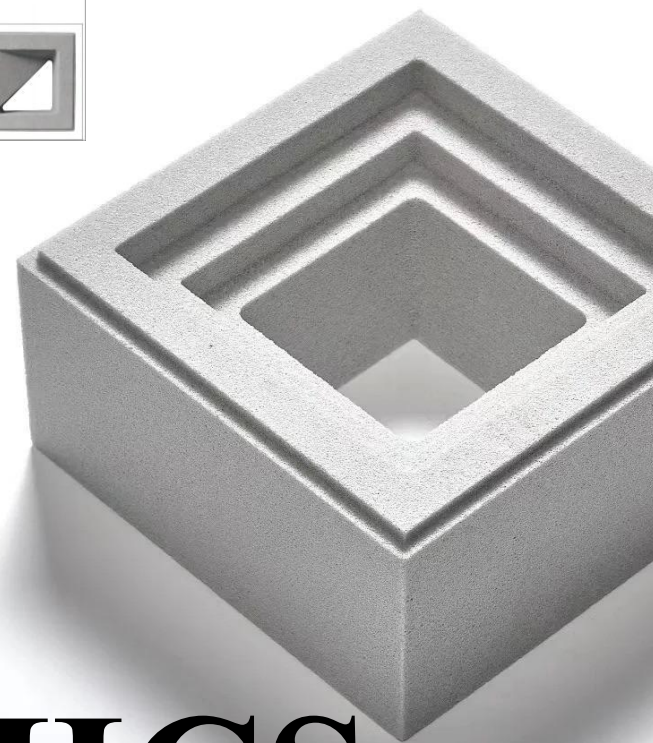

Foamed ceramics indeed represent a remarkable advancement in environmentally friendly materials. Formed from a mixture of ceramic debris, river silt, and waste, this material undergoes a process of powdering via ball milling to achieve its desired properties. Once formed, it exhibits exceptional strength, moisture resistance, heat preservation, and insulation capabilities. Additionally, it provides sound insulation and noise reduction benefits, contributing to a quieter environment. Its eco-friendly nature, coupled with its stability and weather resistance, makes it a valuable option for various applications.

Classic Tiles

FAST: The direct installation time and the time required for the entire project are short, which is far less than the products installation time of traditional cultural stone.

Lightweight: Due to the use of high-tech materials, it is lightweight and does not require any other mechanical cooperation and can be installed by one person.

Durable: The product is made of polymer materials and sprayed with multiple layers of high-strength coatings, making it acid resistant, sun resistant, and UV resistant, making it more durable to use.

Installation Easily: The product mold is finely polished based on real stones, and with special processing techniques, the appearance of the product is realistic and delicate, just like real stones.

Realistic Appearance: The product is designed with an internal card structure, tongue edges, full slots, and reserved seams. Most jobs do not require caulking and can be installed directly with screws and gun nails.

Multifunctionality: All products of Yimei Building Materials have passed professional waterproof, moth proof, and flame retardant tests, and can be applied to almost any dry flat substrate indoors.

P U Multi-screen - dynamic lighting system

DiZhan component light source interactive system injects the power of light and shadow in the design

Interactive lighting is combined with decorative materials to form new art installations.

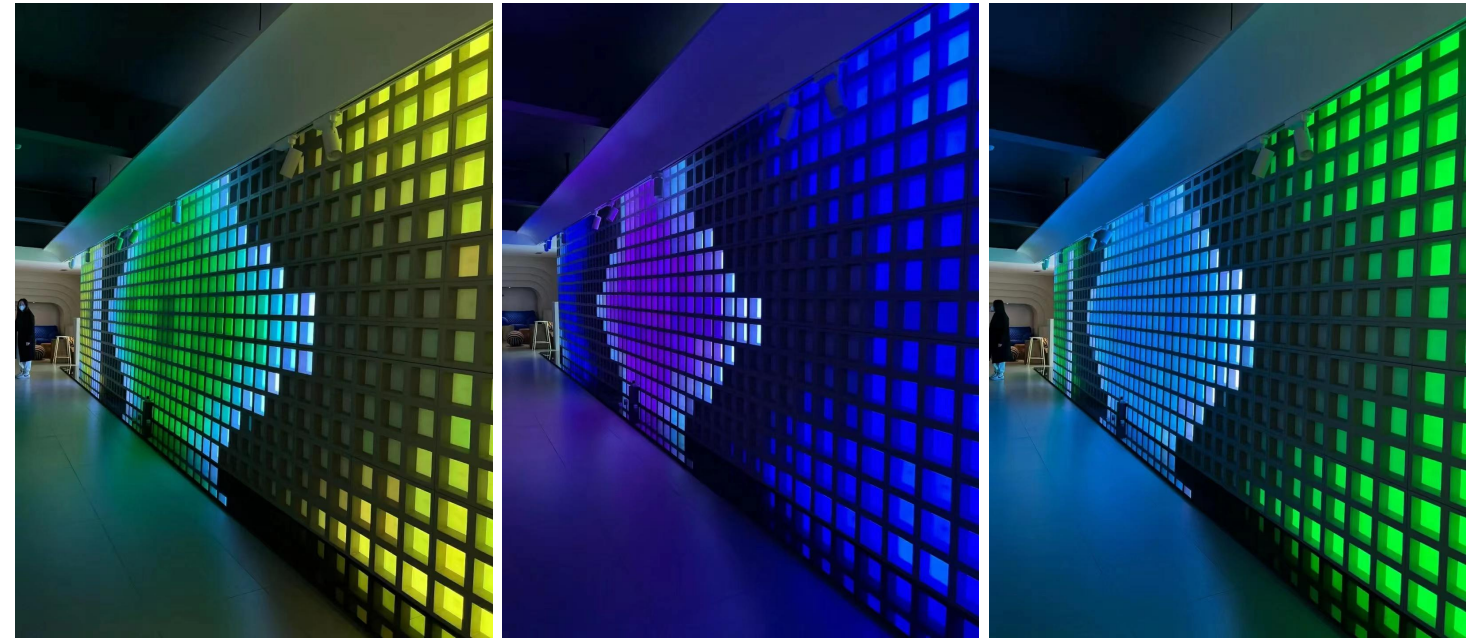

The interactive lighting system provides designers with more design inspiration.

It can be equipped with AI intelligent human body sensing system to realize light and shadow interaction;

Programmable light and shadow effect system presents dynamic effects, adding space interest and creativity.

It embodies the integration of perception and aesthetics, materials and lighting art.

Dizhan component light source interactive system is suitable for hotels, sales offices, clubs, shopping malls and other spaces. Focus on deepening the landing, customized project services, to provide lighting solutions for various commercial projects.

Cement component lighting system

Relying on the increasingly mature intelligent control technology, lighting is no longer limited to a single functional lighting, more and more artists and designers use the physical characteristics of light to create art, creating beautiful lighting art installations. At present, the lighting installation has gradually become popular, and it is used in various art exhibitions, public landscapes, shopping plazas, commercial shops, office Spaces, and even medical projects.

The cement component lighting system is based on the metal component to install custom lamps. The lamp is made of acrylic box and LED light. Lighting system is divided into non-programming system, programming system, human body induction system.

Finished product Size: 155*155*150;

Acrylic frame thickness: 5mm on the side, 7mm on the front;

Light wattage: 2w;

Light color temperature: 3000K yellow light.

No stroboscopic lights

Application scenario: shopping malls, hotels and other indoor space background wall decoration

Abyss Mirror

Net red background wall abyss luminous word

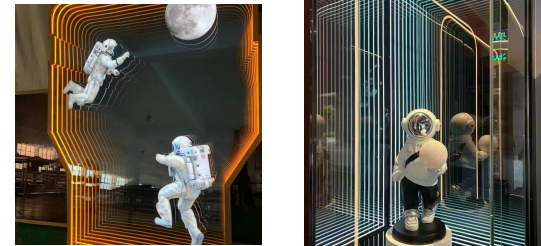

Process: Tempered glass + neon light;

Size: 500*500*60mm conventional and custom models;

Advantages: eye-catching, tunnel sense, good decorative effect, wide range of use;

Applicable: restaurant, KTV, exhibition hall, beverage store, tooling, etc.

Conventional style

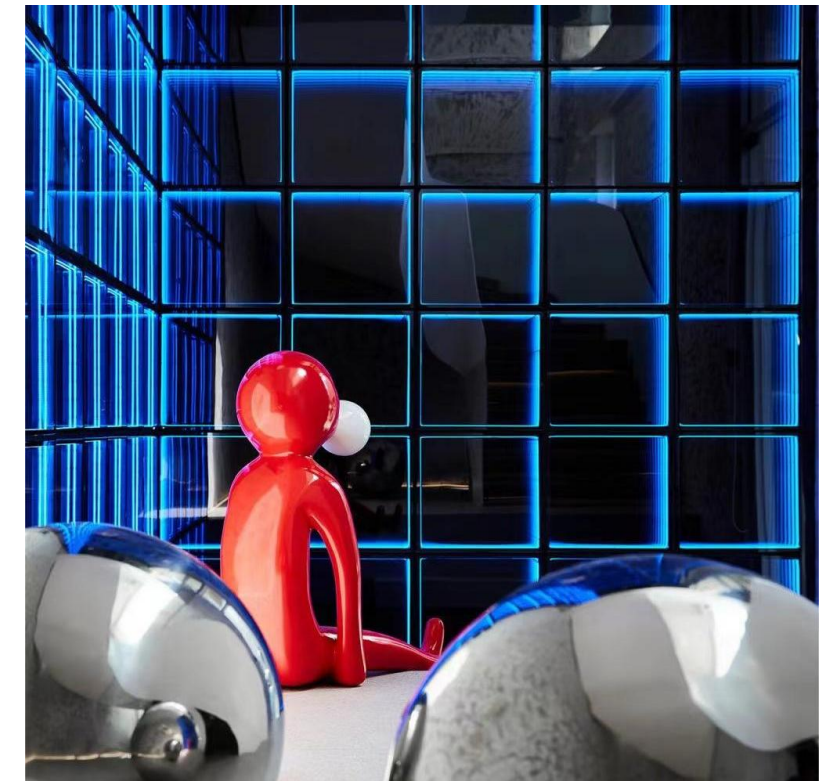

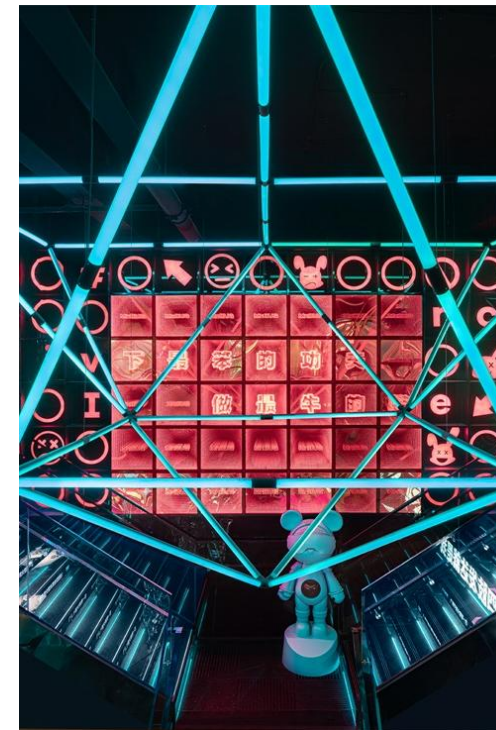

Customized style

Advantages:

1. Tempered glass material, with a straighter effect than acrylic;
2. Provide layout and simple renderings after placing order;
3. Allow to customize any pattern, shape, or color;
4. The light source has a two-year warranty;
4. The chassis is made of high-quality stainless steel material;
5. Suitable for walls, floors, and outdoors.

Provide picture or drawing or AI/CDR. One of them only.

Weaving of bamboo and rattan

Exquisite yet elegant, is a rising decorative material

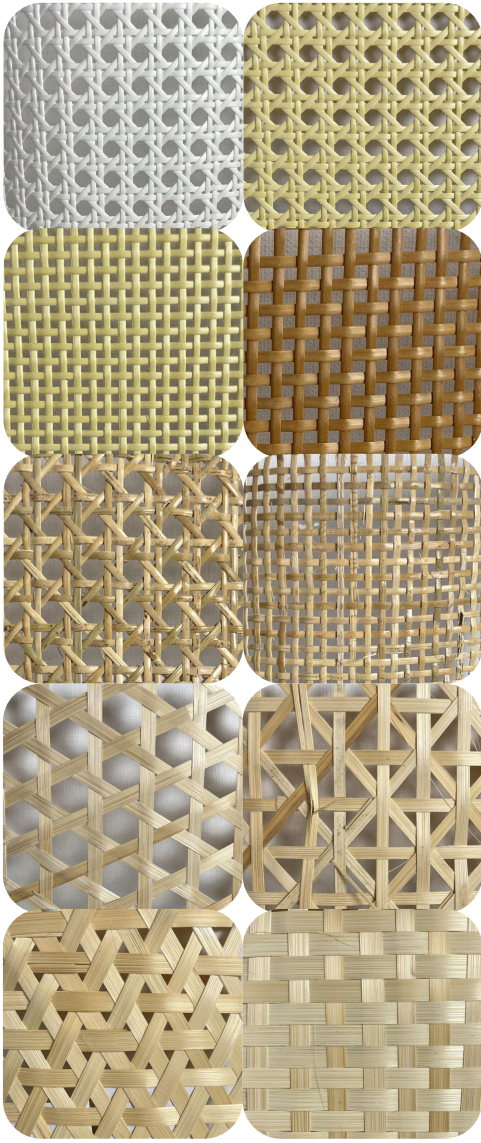

WOVEN TOGETHER

WEAVING

Name: Bamboo woven;
Material: Bamboo;
sizes: 10m*1m.0.6m;
Advantages: Various styles, environmentally friendly and durable, warm in winter and cool in summer (strong moisture and heat absorption ability)
Disadvantage: Easy to mold (the material itself has been treated with mold and insect prevention, but it is recommended to apply another layer of paint, recommended: forest paint).

Name: Tengbian;
Materials: imported from Indonesia;
Size: 15m * 1m/0.6m;
Advantages: sturdy, environmentally friendly, durable, breathable, flexible, and diverse in design
Disadvantages: Burrs (can be solved by construction) and uneven color.

Name: Plastic woven;
Name: PWC;
size: 15m*1m/0.6m;
Advantages: uniform colour, competitive price.

N series handmade tiles, black Future stone

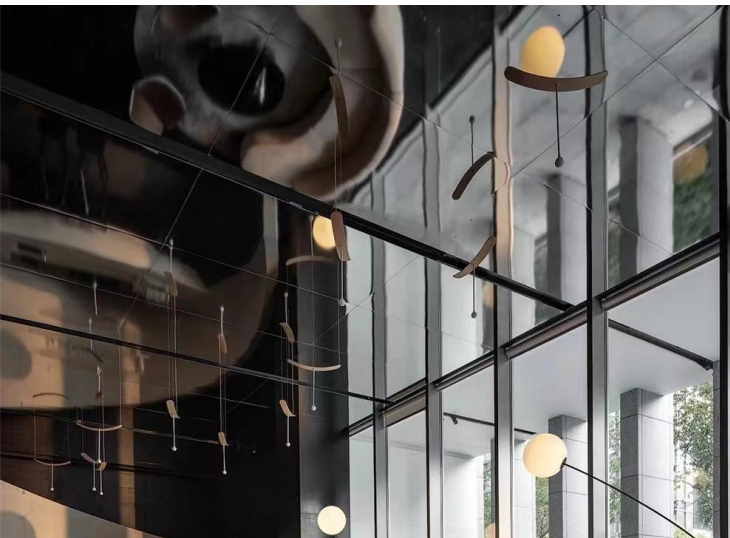

Size: 49*203mm

Features: Matte texture, anti-slip, mildew-proof, moisture-proof, wear-resistant, impact resistance, simple style, versatile space

Super Black Brick

The brick surface is polished and the surface is treated by matte art. The composition of black brick in the forging process is metal, so it has a great advantage in the function of anti-static electricity.

Super black bricks are gorgeous, suitable for entertainment spaces, exhibition halls, and office spaces. The extremely black color tone makes it look like a mirror and it has been used in many commercial spaces, presenting a sense of spatial extension and high fashion.

Specifications of vanadium titanium all-body porcelain black
brick:600*600/800*800/600*900/600*1200mm, non-fouling, anti-fouling, easy to clean, ultra-low water absorption, high wear resistance, long service life, durable

Details contribute quality

Super black brick 9 big lead

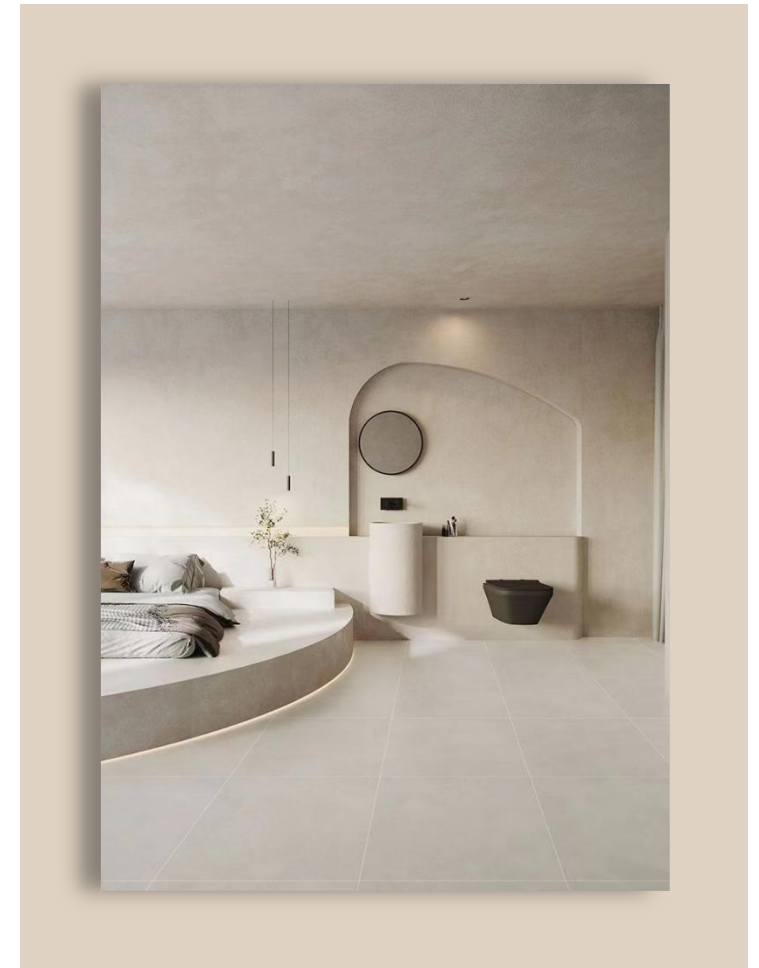

- ① The darkest black brick in the industry, without mixing with other blackening materials, is the darkest brick in China;
- ② Mirror gloss up to 110 degrees;
- ③ After magnification several times, there are no obvious impurities in the polished pinholes compared to others;
- ④ There is no significant difference after exposure to sunlight;
- ⑤ Acid and alkali resistant, ultra-low water absorption, completely anti fouling;
- ⑥ High strength, dense and hard texture, with a strength of over 50Mpa;
- ⑦ A The color of the black brick base is similar to that of the brick surface
B The dyed black bricks have no obvious staining marks on either the four sides or the bottom surface of the bricks
C Contact the brick body, clean and tidy;
- ⑧ The unit weight can reach 9.3kg;
- ⑨ No radiation pollution, green and environmentally friendly, healthy, and unrestricted use.

PLASTER COLOR SWATCHES

0 formaldehyde
Rich in style
A fire protection
Mildew and moisture proof

Plaster, also known as decorative mortar, is a type of interior and exterior wall decorative material originating from Europe.

Composed of special cement, inorganic aggregates, mineral pigments, and special modifiers. Its decorative surface is uneven and has a three-dimensional texture, giving people a natural, fresh, simple and generous decorative effect.

Microcement sample color card

Formation of microaqueous mud

Microcement is mainly composed of cement, water-based resin, modified polymer, quartz, etc., generally used with special primer and wear-resistant protective layer, which can enhance the waterproof, strength, hardness, anti-aging and durability of the finish.

Waterproof, oilproof, no cracking, no dust, anti-friction

Good Product Recommendations

Gypsum lamp

Gypsum lamp is made by dissolving gypsum powder in water to form gypsum slurry, injecting it into a gypsum lamp mold (usually made of silicone), waiting for drying before demolding, repairing and polishing, and finally forming a fixed shaped lamp shell (excluding the light source).

Gypsum also has different densities, with higher densities resulting in finer and smoother products. Our factory uses high-density gypsum.

Advantages of gypsum lamps: it can perfectly blend with walls or ceilings, suitable for minimalist styles. It is also possible to use latex paint brushes with the same color as the wall or top surface to achieve complete uniformity. Some gypsum lamps have beautiful shapes and can serve as good decorative elements for minimalist styles.

Disadvantages of gypsum lamps: A certain ceiling height is required, and wall gypsum lamps require false walls, resulting in a smaller space.

Borderless Lamp

Embedded system

Creative plaster lamp

The plaster lamp body has undergone exquisite craftsmanship processing to restore the visual sense of the palace.
Visualization without flicker, safe and healthy lighting

The details of handmade products are clear and realistic, allowing you to feel the authentic texture of the palace.
