Flame retardant

HD

SPC is the abbreviation of stone plastic composite material. It is not like composite wood, but more like composite stone.

The raw material of SPC is polyester vinyl resin, which is also call the PVC material. Moreover, it strengthens the performance of PVC material.

At the same time, it is extruded by T-shaped mold, which also avoids the internal layer coating and gluing, so its functions are more abundant, and it is non-toxic, formaldehyde free and zero pollution, With a series of characteristics such as renewable materials, even in the future, the SPC floor should be able to be recycled like plastic, which can reduce the cost of house decoration.

Name: SPC background wall

Length and width: Single piece size within 1200 * 3000mm can be customized

Thickness: 6mm

Surface process: bright or matte

Environmental protection grade: E0

Fire rating: B1

-
1. UV layer
 2. 3D inkjet layer
 3. SPC stone plastic
