sales

# S-Soft Stone ... 01

Mimicking natural pore stone effect, fine texture, hole texture, shape, bending to create arc shape, good decorative performance.

## INTRODUCTION

Raw materials: natural stone powder

Product technology: pressing moulding

Patterns and styles: Various or style

Product features: light weight, thin product, strong flexibility, good air permeability, fireproof grade A , waterproof, impact resistance

Application space: indoor and outdoor walls, ceilings can be used, high-altitude buildings, special-shaped shapes, private homes and commercial space background wall

Product specifications: 3000\*600mm Thickness: 3-5mm

# Translucent Art Cement ... 05

Transparent cement is a solid product processed. It is made of cement, aggregates, stones, sand, steel bars, etc., added with optical fibers, and finally formed into a solid board or brick shaped finished product. If there are special requirements, the shape and light source style can also be customized.

## INTRODUCTION

### Product advantage

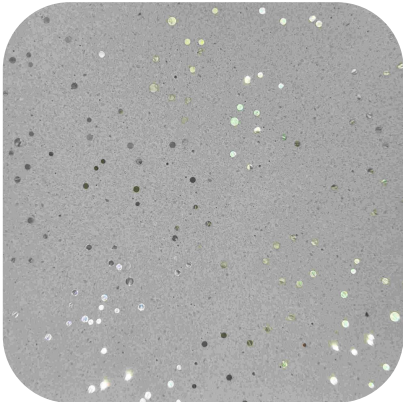

#### 1. Lotus leaf effect

Pervious to light concrete surface using Germany imported paint, paste the active ingredients can penetrate into cement base surface of wool stoma.

#### 2. Self-compacting high flow state

#### 3. High flexural strength

# PU decorative panel ... 07

B Series PU decorative panel with superior quality.

The product is light and durable, heat insulation and low water absorption, easy to process and install.

The product is energy saving and environmental protection, B1 fire prevention, heat insulation, moisture and anti corrosion. PU material is light, strong. Convenient for construction, high installation efficiency.

## INTRODUCTION

Product Name: B Series PU panel

Raw material: Polyurethane + light clay

Size: a variety of specifications and styles

Application space: outdoor building facade, indoor application is also many, such as: wall decoration, column, background wall, partition, bar decoration, etc.

# Ultra Thin Stone ... 08

Ultra-thin flexible natural stone.Ultra thin stone veneer material composed of 100% natural stone surface and backboard. The texture is strong, flexibility is good and good decorative effect with light transmission for certain series available.

Light weight, easy to install and transportation.

## INTRODUCTION

Product Name: P Ultra Thin Stone  
Product Material: Natural rock veneer, quartz sand  
Process: Natural colour separated by nanometer layering technology to retain natural texture of the stone  
Product Features: Natural stone, ultra-thin and ultra-light, clear texture, flexible and transparent  
Application: Indoor & outdoor, ceiling and furniture.

# Bamboo charcoal fiber board 10

Fusion wallboard is made of bamboo and high polymer materials by high temperature extrusion and film covering, which is a new type of environmental protection material. Natural materials, wood process does not contain formaldehyde and other harmful adhesive, environmental health without hidden dangers.

## INTRODUCTION

Product Name:Bamboo charcoal fiber board

Substrate: bamboo carbon fiber co-extrusion substrate

Surface: PET metal membrane

Features:High strength, hardness,Corrosion Resistance,Anti static,Moisture-proof flame retardant

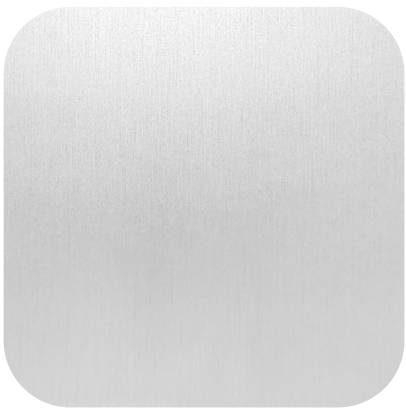

Use space: private house, restaurant, hotel, club, office space are applicable

Product Specifications:1200\*3000\*8mm 20kg/pc

# Acrylic Board ... 11

Acrylic, also known as PMMA or organic glass. Acrylic is an important plastic polymer material developed earlier, with good transparency, chemical stability, weather resistance, easy dyeing, processing, and beautiful appearance. It is widely used in the construction industry.

## INTRODUCTION

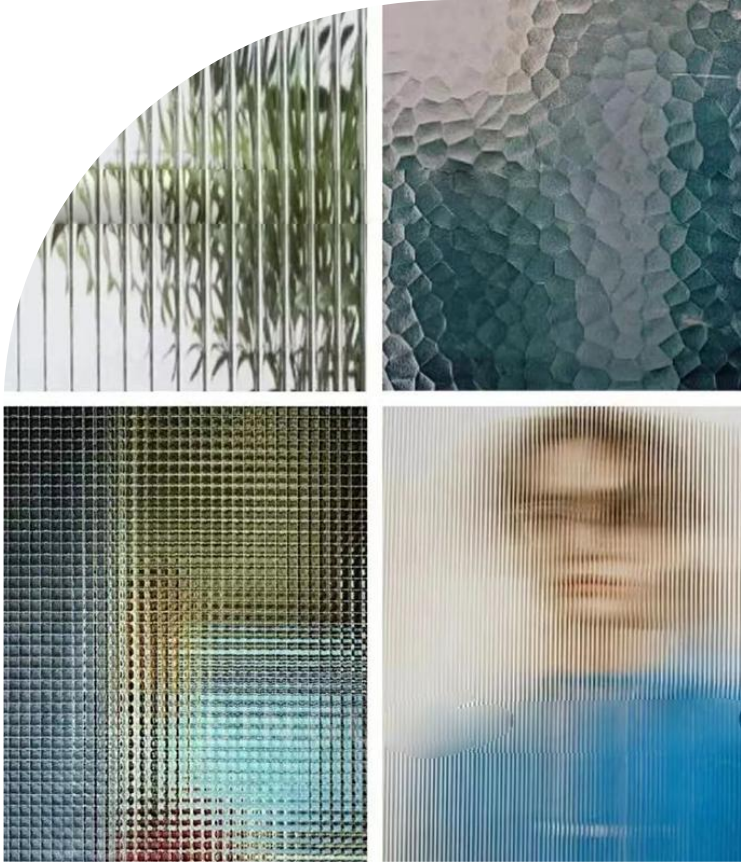

Product categories :

Stripe plate (fine stripe/thick stripe/wide stripe /U stripe /V stripe) Texture board (stone pattern/colored stone pattern/small stone pattern/shell pattern)

Product features: weather resistance and acid and alkaline resistance, good light transmittance, strong impact resistance, excellent insulation performance.

Application areas: ceiling, partition, screen, sliding door, transparent wall, furniture, bar counter, lighting, etc

Product size: 1220\*2440mm    thickness: 5/8/10mm

# Ice Pellet Plate ... 12

The raw material is exported food grade environmentally friendly transparent plastic. It is one half of the weight of glass, indoor can be used instead of glass, and the delivery is not afraid of breaking and other advantages.

## INTRODUCTION

Sheet size: 1220\*2440mm Thickness: 2/3/4mm  
Customized project:  
Customized thickness (2-50mm), with a maximum customizable panel size of 1.22 \* 3.1mm  
Features: Fireproof V2 (equal to B1), Waterproof. High transparency, Strong impact resistance. Free of formaldehyde, good flexibility, moisture and pressure resistance, non yellowing, food grade safety and environmental protection.

# Crystal Brick ... 13

Crystal brick is to use transparent or color glass material to suppress the massive glass products that take shape. Its breed basically is vitreous solid brick. Below majority circumstance, vitreous brick does not use as facing material, as structure material however, use as the similar function such as wall body, screen, partition.

## INTRODUCTION

Substrate: glass

Custom colors: light blue, orange, pink, red, yellow, dark blue, green

Product characteristics :A1 class fire, sound insulation,dust and moisture

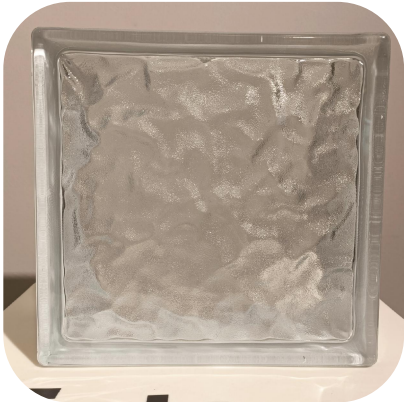

Applicable scene: Tooling private house, indoor andoutdoor, stage decoration, partition wall, bar, etc

# Electroplating Brick ... 14

Electroplating Brick is in the natural stone surface plating metal layer, the use of electrolytic process to deposit metal or alloy on the stone surface, forming metal coating; Highly polished, giving metallic luster; Increase the strength of stone, improve the wear of products. Handmade, different pieces.

## INTRODUCTION

Product name: Electroplated Brick

Product base material: natural white cave stone

Product specifications: 50\*300\*10mm/ (surface)  
50\*300\*9-16mm

Product features: metal texture, clear and delicate color

Application space: commercial space, dining room, bar, bathroom dry area, kitchen wall

# Foam Ceramic ... 15

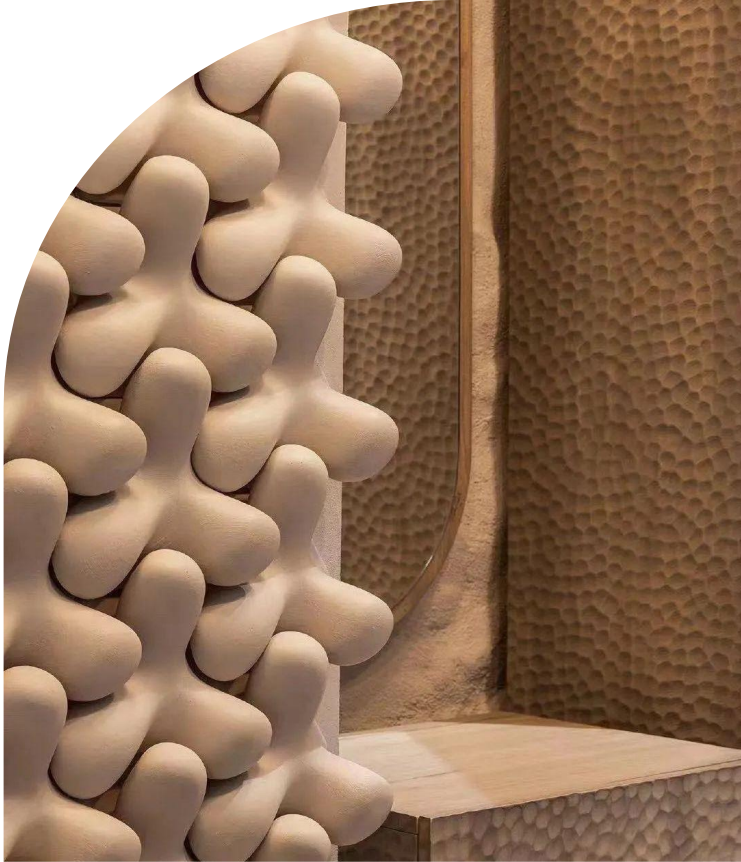

Foamed ceramics is made of ceramic tailings, ceramic fragments, river silt and ceramic solid waste as the main raw materials. It is a closed cell ceramic material with high porosity and high temperature roasting by foaming technology. Foamed ceramics have the advantages of light weight, pressure resistance, environmental protection, easy cutting and carving, and are widely used for indoor and outdoor wall decoration, partition and so on.

## INTRODUCTION

Product specifications: 295\*195\*100mm

Product features: Foamed ceramics have the advantages of light weight, pressure resistance, environmental protection.

Application space: used for indoor and outdoor wall decoration, partition and so on.

# Creative module ... 16

The creative module is made of natural stone and hand-spliced, without the need to lay heavy bricks. It can be glued to the wall. It has good weather resistance, high strength, stain resistance, high cost performance, and rich texture. The collision of creativity and retro style creates beautiful decoration and wide use space. The texture is diverse and the installation is simple.

## INTRODUCTION

Product specifications: multiple options  
Product characteristics: Natural materials, each piece has a different color. Vintage fashion, simplicity and charm, stain and aging resistance, long life.  
Applicable scenarios: indoor and outdoor walls, guesthouses and hotels, restaurants, art galleries, clubs, and ancient gardens.

# Bamboo and rattan plaited articles .17

Bamboo, easy to purchase, cut, bend, and process, is therefore highly favored as an important daily material. Exquisite and elegant.

## INTRODUCTION

1. Bamboo weaving:Bamboo

Advantages: diverse styles, long history, warm winter and cool summer, environmentally friendly, moisture absorbing, strong heat absorption ability, etc

2. Tengbian:Imported materials from Indonesia.

Advantages: Strong breathability, sturdy and durable, environmentally friendly and durable, etc

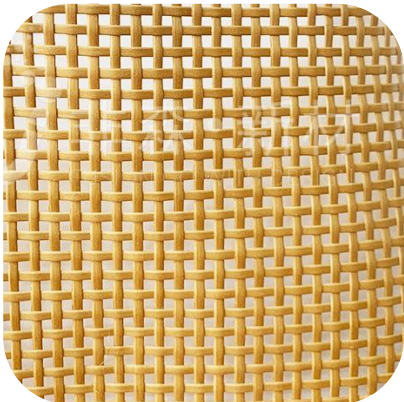

3. Plastic rattan:PVC material

Advantages: uniform color, good taste, and affordable price;Disadvantages: not environmentally friendly, short life.
