WINDPROOF ROLLING SHUTTER

The Windproof rolling shutter

100 polyurethane foaming door panel available
for heat preservation, heat insulation and sound
insulation

Windproof rolling shutter
Patent No.: ZL201220167671.3
In the event of wind load, the windproof wheel
holds on to the windproof rail to prevent the
shutter curtain from derailing and play a role of
resistance to wind.

Windproof rail
Aluminum alloy or profiled bar material is an
option in terms of the users' demand.

Rolling support (automatic adjustment mechanism
of rolling door) Patent No.: ZL201220168038.6
When opening or closing the rolling door, the rolling
support makes automatic adjustment of the relative
positions of the door body and the rail, hence
reducing the resistance and extending the service
life of the door.
